Dear Ms Bevins,

One of the most challenging times a Soldier can face during his or her career as a professional warrior is to stop and take time to heal. For those who choose to defend our great nation, taking time to heal does not come easy as Soldiers take great pride in a "Can Do" and "Mission First" commitment. Soldiers never want to slow down.

Thank you and your organization for supporting our Soldiers and their Families, not everyone has the financial resources they would like during the Holiday. The gifts donated to the Warrior Transition Battalion Soldiers were a huge success.

As Norman Schwarzkopf once said; "The truth of the matter is that you always know the right thing to do. The hard part is doing it." Thank you for being a Patriot, honoring those who serve our nation, and for doing the hard part.

Sincerely,

A handwritten signature in black ink that reads "Edwin W. Larkin".
